

ALTUN company has been manufacturing the highest quality asphalt maintenance equipment for over 10 years .

The initial product offerings included asphalt recyclers and a hotbox and has grown into over 10 different product offerings to fit the needs and budget of any contractor or municipal .

Our company has remained true to its steadfast commitment to manufacturing the most versatile and reliable equipment on the market.

This commitment is just one of the many reasons ALTUN equipment can be seen in use in over 40 cities of Iran country

TB6500 Asphalt recycling machine

Now is the perfect time to get your hands on a TB6500 Asphalt Recycler. This machine recycles old asphalt and asphalt millings to produce high-quality HMA (hot mixed asphalt) right at your disposal, no matter the weather or temperature. This asphalt recycler can eliminate your dependence on cold patch asphalt, which is only a temporary fix that can lead to cracks or potholes after a short amount of time. You shouldn't settle for a less dependable option for a simple fix! Get yourself a TB6500 to have effective, high-quality asphalt whenever you need it .

The TB6500 is an asphalt recycling machine capable of producing 8 tons of hot mix asphalt in an hour.

The TB6500 asphalt recycler trailer will recycle asphalt millings, chunks, and other RAP (Reclaimed asphalt pavement) material into plant-grade asphalt .

This device allows contractors the ability to perform year-round repairs with quality hot mix asphalt material

OTHER FEATURES

- _ Equipped to bitumen tank with heater , Bitumen spraying automatically and the ability to use all types of standard bitumen available
- _ Can be used in all weather conditions, especially cold winter conditions
- _ Equipped with high power generator
- _ Ability to use generator electricity and city electricity
- _ Reduce the cost of asphalt production by up to 80%
- _ Reduce bitumen and asphalt consumption by up to 85%
- _ All the equipment used in the devices of this company have European standards.

SPECIFICATIONS

Trailer Specs:

Dimensions (l x W x H) - 6m x 2m x 2m

Weight - 3 ton

Axels - Dual 2 ton . axels

Asphalt Heating Drum:

Rotation - Hydraulically controlled, approx. 8 RPM

Heating System:

Fuel - Diesel

Fuel Storage -80-gallon fuel tank with filter and manual shut off

Burner :

BTU Output - 700,000 diesel burner

Loading/Unloading:

Loading - Milled asphalt or broken chunk pieces up to 30cm

Unloading - Unload directly into application area or into front end loader bucket
